**New Mobile App Will Tell Clinton County
Voters “WhereUVote”**

CLINTON – Clinton County Auditor and Commissioner of Elections Eric Van Lancker announced today the debut of a new mobile device app that will assist Clinton County voters to know where and when they can vote for upcoming elections, such as the November 8, 2016, General Election.

“WhereUVote IA - Clinton County” was developed by Evil Twin Software. Voters can enter their address into the app and it will tell the voters where to vote on Election Day. The app will also inform voters where they can vote absentee before Election Day. For instance, it will inform voters when and where satellite voting is available the days before an Election Day.

“My office staff and I have recognized a growing number of calls from voters during the last couple of years asking where they vote,” Van Lancker explained. “We’ve been trying to come up with a solution to reach today’s voters and this opportunity from Evil Twin Software recently presented itself.”

Earlier this year, Van Lancker and the Clinton County IT staff worked together to create a page on the Clinton County web site for voters to enter their address to find their voting location.

“The WhereUVote Clinton County app is a great compliment to the voter outreach we started on the County web page,” Van Lancker said. “This app will open a navigation app on the user’s device that will display the name of the polling location and where it is located on the map.”

The app is available for Apple and Android mobile devices. The app is found in applicable app stores.
