 Wiring a facility or location to accept a generator – Existing Facility/Location
 Purchase of Generator and associated installation costs – New Facility
 Purchase of Generator and associated installation costs – Existing Facility
 Other – Please Specify _____

H. Anticipated Project Start Date: _____

I. Estimated Completion Date: _____

J. BUDGET

Dollar amount requested:	\$
Total project budget:	\$

Grant requests of less than \$15,000 require a 25% Community Match.
 Grant requests of \$15,000 or more, with a cap of \$100,000 Generator Grant Program Funds, require a 50% Community Match.

K. Please briefly describe the source of the Community Match funds for the project.

First Priority will be given to generators that will be incorporated into new construction. The Commission feels that this is the best time to incorporate emergency generators into buildings and the most cost efficient. Priority will also be given to government buildings that may be used for sheltering citizens during and after a disaster. These buildings shall meet minimum shelter requirements as prescribed by the Red Cross and have a written agreement for sheltering with the Gateway Area Red Cross and/or with the Clinton County Emergency Management Agency before the installation of the generator or generator related equipment. (It is also allowable for an entity who wishes to upgrade wiring and install switch gear so that a building can accept a generator in lieu of purchasing a generator to apply for funding.) Additional consideration will also be given to critical government facilities (e.g. Fire Stations, City Halls, Public Works, Police Departments) that are currently without emergency power. Non Government buildings may also apply for Generator Grant funding.

All projects funded through the Generator Grant Program must be located within the borders of Clinton County.
