MEDIA RELEASE

March 30, 2017

The Clinton County Sheriff's Office has recently purchased new records and jail management software from Zuercher Technologies. This is a joint project with the Camanche, Clinton and DeWitt Police Departments. Clinton County Communications purchased Zuercher Computer Aided Dispatch (CAD), which is also part of the county wide system.

As part of this new software suite, the public now has the ability to research persons who are in the Clinton County Jail as well as persons living in Clinton County who are listed on the Iowa Sex Offender Registry. To access this information via the internet, please use the following link:

Sheriff's Sales are currently not available at this time. We are working to make these notifications available in the near future.

The Records Management system utilized by the four law enforcement agencies was funded by a grant provided by the Clinton County Development Association.

Rick Lincoln, Sheriff
