D. IF NO, please describe your organization on a separate piece of paper.

PROPOSAL INFORMATION

Please give a brief summary of request (500 Character Maximum):	
Population served through grant request:	Geographic area served through grant request:

E. What is the current use of the Facility or Location the funding is being requested for?

- Fire Station
- Police Station
- City Hall
- Other Government Owned Building – Please Specify _____
- Non Government Owned Community Center – Please Specify Ownership _____
- Other – Please Specify _____

F. What is the address or location of the site?

--

G. Funds are being requested for (check one):

- Purchase of a Generator Only
- Wiring a facility or location to accept a generator – New Facility/Location
- Wiring a facility or location to accept a generator – Existing Facility/Location
- Purchase of Generator and associated installation costs – New Facility
- Purchase of Generator and associated installation costs – Existing Facility
- Other – Please Specify (Include an additional page giving a full rationale for why this project should be considered a priority in Clinton County, how it will enhance emergency preparedness and how this resource will be made available to other agencies within the County.)

H. Anticipated Project Start Date: _____

I. Estimated Completion Date: _____

J. BUDGET

Dollar amount requested:	\$
Total project budget:	\$

Grant requests of less than \$15,000 require a 25% Community Match.
 Grant requests of \$15,000 or more, with a cap of \$100,000 Emergency Management Grant Program Funds, require a 50% Community Match.

K. Please briefly describe the source of the Community Match funds for the project. (250 Character Maximum)

First Priority will be given to generators that will be incorporated into new construction. The Commission feels that this is the best time to incorporate emergency generators into buildings and the most cost efficient. Priority will also be given to government buildings that may be used for sheltering citizens during and after a disaster. These buildings shall meet minimum shelter requirements as prescribed by the Red Cross and have a written agreement for sheltering with the Gateway Area Red Cross and/or with the Clinton County Emergency Management Agency before the installation of the generator or generator related equipment. (It is also allowable for an entity who wishes to upgrade wiring and install switch gear so that a building can accept a generator, in lieu of purchasing a generator, to apply for funding.) Additional consideration will also be given to critical government facilities (e.g. Fire Stations, City Halls, Public Works, and Police Departments) that are currently without emergency power. Non Government buildings may also apply for Grant funding. The Grant Program is intended for purchasing generators for the local community, however, it is possible that there are other emergency preparedness needs that are not being addressed or funded through other sources. If you are applying for funds for a non-generator program, the Commission may have different requirements and ask for different documentation as it sees necessary.

All projects funded through the Grant Program must be located within the borders of Clinton County.
